

Greenhouse Gas Reporting

Our Carbon Footprint

Our greenhouse gas emissions for the year ended 31 December 2017 were calculated in accordance with the GHG Protocol Corporate Accounting and Reporting Standard (2011 edition) and emission factors from UK Government GHG Conversion Factors for Company Reporting 2017. The calculation incorporates the six Kyoto gases including carbon dioxide, methane, nitrous oxide and hydrofluorocarbons (HFC's), and reports them in tonnes of carbon dioxide equivalents (CO₂e).

Methodology

Using the operational control consolidation method we have reported on all scope 1 (direct) and scope 2 (indirect) emissions required under the Companies Act 2006 (Strategic Report and Directors' Report) Regulations 2013 and have voluntarily included some of our scope 3 emissions. These sources fall within our consolidated financial statements. We do not have responsibility for any emission sources that are not included in our Financial Statements.

Emissions relating to subsidiaries for which we have operational control have been included at 100% and emissions relating to joint ventures for which we have 50% operational control have been included at 50%. This is consistent with the treatment of subsidiaries and joint ventures within our financial statements.
